- For two-letter codes and other abbreviations, refer to the "Guidance Notes on Codes and Abbreviations" appearing at the beginning of each regular issue of the PCT Gazette.

(54) Title: **PLAYLIST SYNCHRONIZATION**

(57) Abstract: A user device (1), such as an MP3 player, is capable of downloading and storing content items, such as songs or video clips. To ensure that the memory of the user device is always filled to capacity, even when the downloading is interrupted, the user device marks any old content items that may be deleted and only deletes these deletable content items when necessary for releasing memory space.
